

Alleviate Pressure and Minimize Pain from Subtle Cavus Foot

The DonJoy Arch Rival orthotic is designed to treat Subtle Cavus Foot by promoting natural foot function which includes improving stability, adding shock absorption, and alleviating pain. The recessed area under the 1st metatarsal head accommodates the plantar-flexed 1st ray and allows hindfoot eversion. The elevated heel works to cushion the heel and accommodate for tight calf musculature.

The Arch Rival orthotic is soft, comfortable and shock absorbent. Each pair is manufactured with X-Static Technology, which is proven to prevent blisters and odors. Available in seven (7) trimmable sizes that fit in most types of athletic and comfort walking shoes.

The DonJoy Arch Rival orthotic is used to treat or prevent the following injuries:

- Subtle Cavus Foot (SCF)

Product Features...and the benefits you'll experience!
